Designed and manufactured in  Australia to the highest quality standards

Billi®

Originating in Australia, Billi has been at the forefront of the instant filtered boiling and chilled water systems industry for over 30 years. Billi products are celebrated for their combination of functionality, performance and contemporary aesthetics. Proudly Australian-made and designed, Billi products have brought a unique concept of underbench instant filtered boiling, chilled and sparkling drinking water to many countries around the globe.

Manufactured in Melbourne, Australia to strict quality standards, Billi water systems come with an assurance of quality, innovation and sustainability. Incorporating cutting edge eco-technology features and modern designs, Billi delivers solutions that keep pace with the ever-changing needs of its users.

Designed and manufactured in Australia to the highest quality standards

WHY BILLI

Synonymous with innovation, Billi prides itself on being the leading designer and manufacturer of boiling, chilled, sparkling and still filtered water systems.

With all Boiling & Chilled units manufactured in Melbourne, Australia, we are uncompromising on quality and dedicated to delivering the most reliable, high performance and stylish products on the market.

The Billi range of products include industry leading features such as water-cooled technology, space saving underbench footprints, specialty dispensers, plus a large range of models that do not require cupboard ventilation cut outs or grilles. This makes our units easy to install, energy efficient and user-friendly for all.

CUSTOMER FOCUS

In every interaction with Billi, our commitment to the highest levels of customer service is evident.

Billi's unequalled aftersales care and product support, ensures that our valued relationship with our customers does not end at purchase.

Billi goes a step further with dedicated teams servicing each of our markets to ensure specialised care relevant to your requirements.

Matte Black XL Levered Dispenser with matching Square Mixer Tap

IWBI MEMBERSHIP

During 2024, Billi once again pioneered the representation of the drinking water category by participating in the first iteration of the IWBI's 'Works with WELL' program, focusing on product certification.

The membership program at IWBI convenes, celebrates and fosters collaboration with companies and organisations who are leading the movement to advance human health in buildings and communities around the world. This dynamic framework allows Billi to tap into IWBI's expansive resources and knowledge and demonstrates Billi's alignment with IWBI's mission.

"IWBI focuses on transforming health and wellbeing with our people-first approach to buildings, organisations and communities. As an IWBI Member, Billi has been an engaged contributor to the WELL movement since 2019 and we continue to enjoy a productive and collaborative relationship between our organisations within the region."

Jack Noonan, Vice President, International WELL Building Institute, Asia Pacific.

ABOUT IWBI

The International WELL Building Institute (IWBI) is leading the global movement to transform our buildings and communities in ways that help people thrive.

WELL v2 is the current version of its popular WELL Building Standard, which will continue to be offered to the market, along with the WELL Community Standard, a district-scale rating system that sets a new global benchmark for healthy communities.

WELL is focused exclusively on the ways that buildings and communities, and everything in them, can improve our comfort, drive better choices, and generally enhance, not compromise, our health and wellness.

IWBI convenes and mobilizes the wellness community through management of the WELL AP credential, the pursuit of applicable research, the development of educational resources, and advocacy for policies that promote health and wellness everywhere.

For more information about IWBI and WELL, please visit: www.wellcertified.com

**SPACE SAVING DESIGN**

With a focus on space saving, Billi systems have one of the smallest footprints on the market, allowing you to make the most of the valuable underbench space.

**SAFE TO OPERATE**

All dispensers offering boiling water are supplied standard with a safety switch to lock off access to boiling water where needed. The red lock icon demonstrates when the safety switch is activated. Simply touch the sensor switch to release the lock and activate the boiling water. The dispenser will revert to safety mode after a period of non-use.

**SPLASHFREE DELIVERY**

Billi's Splashfree boiling water delivery electronically varies the water flow, slowing momentarily to eliminate splashing as the water first enters the cup.

**ENERGY EFFICIENT**

Billi's unique Heat Exchange Technology enables our systems to achieve substantial energy savings. Our units also feature a standby mode which conserves energy by powering down after 2 hours of non-use.

**HEAT EXCHANGE TECHNOLOGY**

Billi's unique heat exchange & energy reclaim technologies recovers the waste heat energy produced in the chilling process to preheat the boiling water. This allows boiling water to reach optimal temperature more efficiently while achieving substantial energy savings.

**WATER-COOLED or AIR-COOLED TECHNOLOGY**

Billi are the only manufacturer to offer both water-cooled and air-cooled options. Our water-cooled systems utilise heat exchange & energy reclaim technologies and are more energy efficient than our air-cooled systems. Billi's heat exchange technology ensures water usage is minimal. Billi's air-cooled options generate far less heat than traditional air-cooled systems.

**NO CUPBOARD VENTILATION REQUIRED**

Billi's Water Cooled systems do not require cupboard ventilation or a cooling fan and operate a lot quieter than air cooled systems.

**ADJUSTABLE CHILLED TEMPERATURE**

A simple adjustable control knob allows the chilled water temperature to be raised to 15°C or lowered to 6°C for perfectly chilled, refreshing drinks. Your desired temperature is reached quickly and maintained efficiently during operation.

**ADJUSTABLE SPARKLING LEVEL**

Adjust the level of sparkling to suit your taste, with adjustable controls up to 5 bar of CO₂ pressure.

**ICE BANK TECHNOLOGY**

Our Ice bank technology has a chilled reservoir where both sparkling and chilled water supply passes through. In doing so, the dispensed water temperature is consistently chilled, also providing a higher level of carbonation.

**PLUS MODELS AVAILABLE**

Billi's PLUS models can function as your hot water service providing hot and cold water, as well as boiling, chilled, sparkling or still water. PLUS models also feature a boiling water reserve to ensure you will have a boiling water supply after the hot water supply is fully drawn. Ideal for areas without a hot water supply.

**UNLIMITED FILTERED WATER**

The Billi Alpine, Sahara, Quadra and Filter Tap ranges all offer a bottomless supply of still filtered water.*

**ECO-INTELLIGENCE TECHNOLOGY**

The Billi Eco & Sahara systems incorporate Eco-Intelligence technology which is a self learning timer allowing the unit to only operate when required. The self learning timer monitors daily usage patterns and even recognises evening and weekend changes in routine to effectively minimise energy consumption.

**CHOICE OF DISPENSER DESIGNS**

A wide array of fit-for-purpose and designer options are available to suit all specifications. Ranging from our commercial flagship X-series with DDA compliant accessories such as braille or vision contrast levers, through to mechanical Slimline dispensers or the award-winning and newly released Multifunction Mixer Tapware in a range of architectural finishes.

**EASY INSTALLATION**

By eliminating the need for cupboard cut outs, our units are quick, easy and safer to install. Our units also feature a self commissioning function making setup simple and efficient.

**AUSTRALIAN DESIGNED & MADE**

All Billi units are designed and manufactured in Australia.

**ACCESSORIES**

Billi has a range of stylish and functional accessories to match your needs including fonts, risers and tubing extension kits.

* Safety time-out features and the required filter changes for hygiene still apply.

Certification for Sustainability

The Global Greentag certification is much coveted by global manufacturing businesses for its evidence-based approach to sustainable product certification.

Billi has been repeatedly certified and re-certified by Global Greentag since 2012, at the Gold Level of the LCARate Program and possesses an Environmental Product Declaration under EPD EN 15804.

The program is recognised by rating tools such as Greenstar® Australia and New Zealand, NZ Homestar®, LEED® and BREEAM®, IS® Rating and WELL® features, encompassing:

- Building / Product Synergy
- Health & ecotoxicity
- Life Cycle Analysis – Water
- Life Cycle Analysis – Greenhouse Gas
- Corporate Social Responsibility

EXPLORE MORE

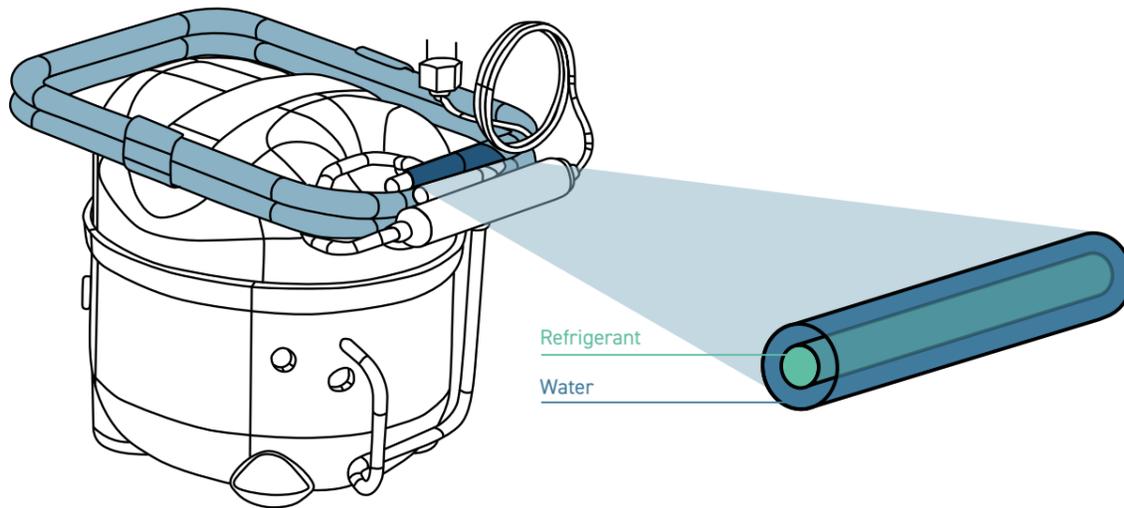

Billi's Sustainable Technologies

A unique industry proposition, Billi's dual technology proposition incorporates the energy efficiency and heat transfer benefits of Water Cooling, with the water efficient Heat Exchange technology.

Water is a more effective conductor of heat than air and keeps the system running at much more consistent and efficient operating temperatures. This in turn saves on energy costs and reduces your carbon footprint.

Additionally, water cooled systems DO NOT require any fans, cross ventilation, clearance tolerances or joinery cut outs to keep the system cool.

Our Heat Exchange technology ensures waste heat is exchanged within the system to generate a viable source of heating energy and contributing to Billi's Net-Zero and Sustainable Development Goals.

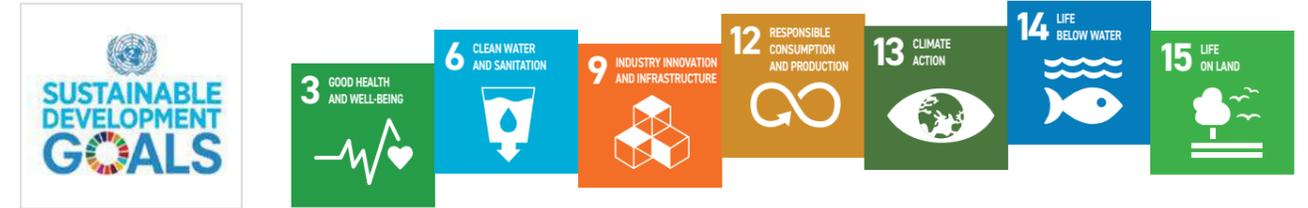

Billi compressor component shown, highlighting unique reclaim technology.

Unlocking a sustainable future begins with a shared commitment to the United Nations Sustainable Development Goals (SDGs) – a profound set of 17 interconnected objectives designed as a global benchmark. These goals intricately address the multifaceted challenges our world faces, setting the stage for a harmonious coexistence between people and the planet.

At Billi, we wholeheartedly embrace this global initiative by aligning our mission and practices with the UN SDGs.

Our pledge is more than a commitment; it's a proactive step towards contributing to the worldwide endeavour for a more equitable, sustainable, and inclusive world.

Our process

At Billi, sustainability and innovation stand as cornerstone principles within our operational framework. Our steadfast commitment to integrating sustainability across all aspects of our business model is evident from the outset. From the meticulous sourcing of raw materials to the thoughtful design of sustainable solutions and concluding with our rigorous recycling practices for both packaging and products, every step reflects our dedication to environmental stewardship.

SUSTAINABILITY IMPACT

Our sustainability journey transcends the traditional boundaries, reaching beyond the realms of manufacturing and product usage.

REDUCING CARBON FOOTPRINT

Our commitment to environmental responsibility is reflected in our range of water-cooled products. Certified by Global GreenTag, our water-cooled products boast a lower carbon footprint that is known & measurable.

WASTE REDUCTION

We recognise the urgent need to minimise all forms of waste, and to fulfill this commitment, we have forged strategic partnerships within the industry. These collaborations are designed to ensure the recyclability and re-use of materials wherever possible.

ENERGY SAVING

Billi's range of water-cooled products stands out for its innovative approach to sustainability. Our products possess the unique capability of converting waste heat into a valuable source of heating energy. By harnessing waste heat and turning it into a usable energy source, our water-cooled products exemplify a commitment to resourcefulness and environmental responsibility.

EMPOWERMENT & GOOD GOVERNANCE

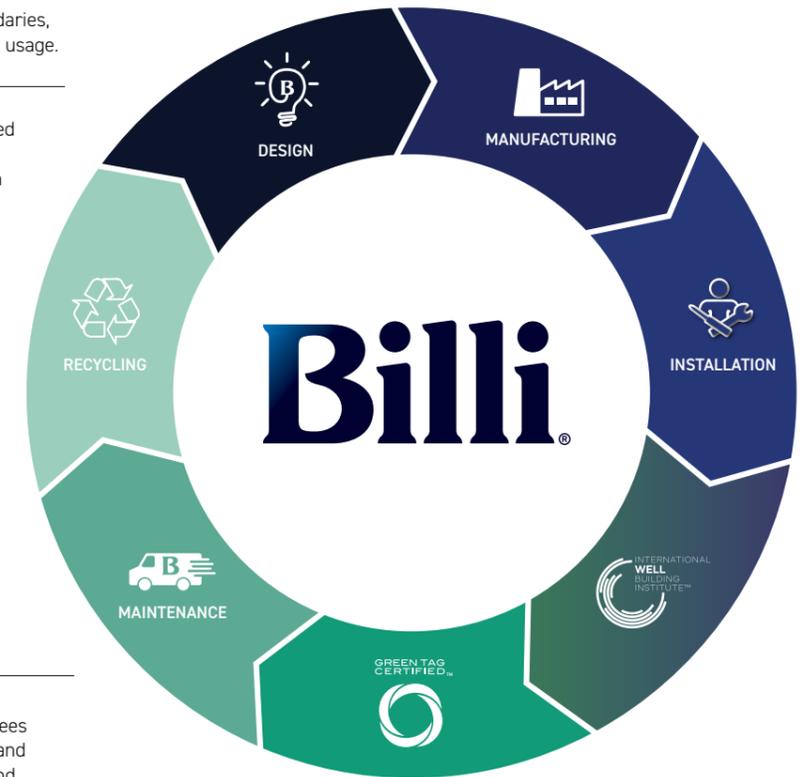

Billi provides a supportive environment where our employees are not only encouraged but also empowered to embrace and promote sustainable practices in both their professional and personal lives. We are also empowered and guided by the measured principles of QMS and EMS Certification.

CERTIFICATION

Our dedication to environmental responsibility is underscored by our active participation in global initiatives like Global GreenTag, Billi has been evaluated and awarded Management System Certifications in accordance with ISO 14001 Environmental Management (EMS), ISO 9001 Quality Management (QMS) and ISO 45001 Workplace Health & Safety (WHS).

WELLBEING

We proudly hold a Cornerstone Membership with the International Well Building Institute, a testament to our dedication to setting new standards in creating environments that prioritise health and well-being.

Billi

ADVANCED
MULTI-STAGE
FILTRATION
TECHNOLOGY

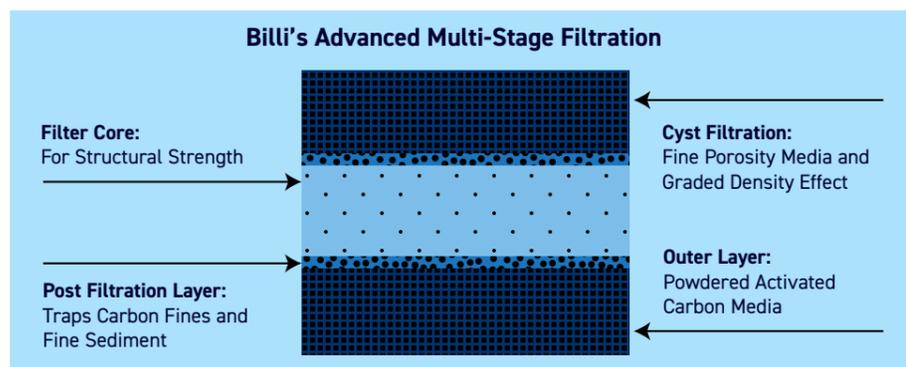

Billi prides itself on offering world class water filtration products and continues to partner with global leading experts in all areas of water filtration.

- Activated carbon fibre
- High level chlorine & chemical adsorption
- Turbidity reduction
- Chemical taste & odour reduction
- Graded density structure to remove cysts with low pressure drop (994052 only)

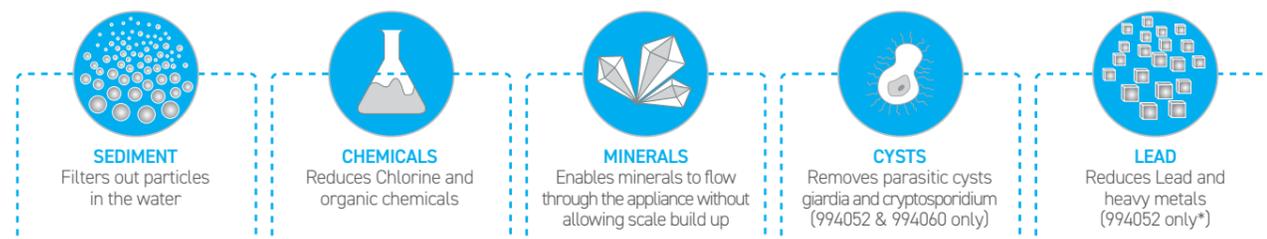

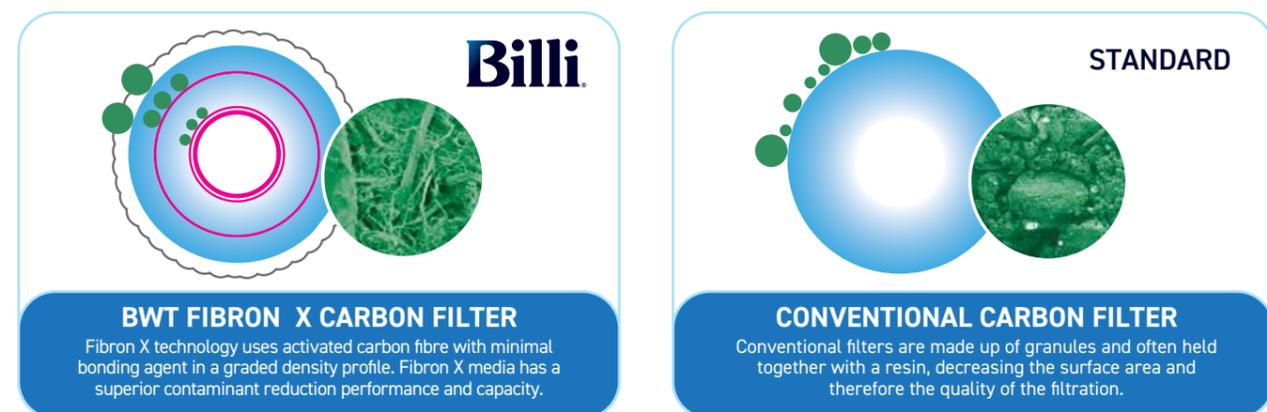

Billi & BWT

Billi has partnered with BWT to provide the highest quality filters. BWT is Europe's largest water treatment products company.

Billi's range of premium filters utilise BWT's unique Fibron X technology. Fibron X technology has a graded density profile ensuring maximum performance and capacity. Billi's filter range provides superior water quality, consistent filter life and peace of mind.

Billi Premium Filtration vs Standard Filtration

Billi filters have been independently tested and certified by IAPMO to international standards and Australian Watermark. Billi filter performance testing is conducted in accordance with international standards NSF, WRAS and Watermark.

*Lead Reduction on 994052 @ 98.93%

Replacement Filters

Periodic replacement of filters is necessary to maintain water quality. Genuine replacement Billi filters are available on our website and from your local approved supplier. Filters are also available to suit the needs of different water supply areas.

Billi recommends you change your filter at least 12 months. However, close attention should be paid to local water conditions as it may be much sooner.

All Billi genuine filters come with Hygiene Protection Protocols. These protocols are designed to protect the end user from cross-contamination, while concurrently supporting the optimal function of your Billi product.

For further installation instructions refer to your user guide or visit our website. [EXPLORE MORE](#) Search: [Billi How to](#)

Easy filter change. Simply swing forward and slide out to replace filter.

5 Micron Fibron X[®] Replacement Filter 994051

Nominal Filter Rating | 5 Micron
 Filtration Capability | Sediment, Chlorine, Taste & Odour
 Flow Rate | 3.8lpm
 Water Pressure | 80 kPa min - 860 kPa max
 Capacity | 30,000 litres (Chlorine reduction)
 Water Temperature | 38°C max; Must not freeze

0.2 Micron Fibron XC[®] Replacement Filter 994052

Nominal Filter Rating | 0.2 Micron
 Filtration Capability | Sediment, Chlorine, Taste & Odour
 Parasitic Cysts, Lead
 Flow Rate | 3.8lpm
 Water Pressure | 80 kPa min - 860 kPa max
 Capacity | 30,000 litres (Chlorine reduction)
 Water Temperature | 38°C max; Must not freeze

HSD Fibron XT[®] Replacement Filter 994054

Filtration Capability | Sediment, Chlorine, Taste & Odour
 Flow Rate | 3.8lpm
 Water Pressure | 80 kPa min - 860 kPa max
 Capacity | 30,000 litres (Chlorine reduction)
 Water Temperature | 38°C max; Must not freeze

Sediment Only Replacement Filter 994056

Filtration Capability | Sediment
 Flow Rate | 3.8lpm
 Water Pressure | 80 kPa min - 860 kPa max
 Capacity | 30,000 litres
 Water Temperature | 38°C max; Must not freeze

0.2 Micron HF Sediment Only Replacement Filter 994060

Filtration Capability | 0.2 Micron HF Sediment
 Flow Rate | 3.8lpm
 Water Pressure | 80 kPa min - 860 kPa max
 Capacity | 10,000 litres
 Water Temperature | 38°C max; Must not freeze

We're proud to announce a major milestone. Billi has produced our **500,000th** cartridge in September 2024! This achievement is a testament of dedication with our loyal partner **BWT**.

Case Study 1: Our Hydration Solutions for Healthcare Hubs

Project Overview

Billi's latest installation was in Murdoch Square, a sprawling 1.2-hectare, \$450 million development in Western Australia. It's a multi-faceted complex, housing the state's first purpose-built Medihotel, a Courtyard by Marriott hotel, a private hospital, an aged care facility, and a range of commercial and retail spaces. This ambitious project aims to significantly contribute to the government's vision of transforming the area into a specialised health precinct.

The Challenge: Adding Functionality and Aesthetics in a Healthcare Project

Perfect Practice Designer – Darcy Miller, that specialises in development projects like this, was tasked with creating a functional interior design within Murdoch Square. The waiting area, a crucial point of contact for patients and visitors, required a solution that could meet the demands of a high-traffic area while maintaining a calm and sophisticated ambiance.

The Solution: Billi Alpine 125 with Matte White XL and Matching Font & Riser

The Billi Alpine 125 under-bench system, paired with the elegant Matte White XL tap and matching Matte White font & riser setup, was a perfect fit for the existing cabinetry design.

The Results and Benefits: (Functions, Safety & Health)

- **Safe Integration:** The Alpine 125's compact design allowed for discreet installation, preserving valuable space and maintaining the clean lines of joinery. The Matte White XL tap and font/riser, with its understated elegance, seamlessly blends with the modern aesthetic of the space.
- **Hydration Station:** The system provides instant access to filtered chilled water, catering to the hydration needs of patients, visitors, and staff. The controls and intuitive interface ensured ease of use for all.
- **Hygiene Protection Protocol:** In a healthcare environment, hygiene is paramount. Billi's advanced filtration technology ensures the delivery of clean, safe drinking water, while the riser minimizes the risk of cross-contamination.
- **Wheelchair Accessible:** The Billi font allows for custom installation and easy wheelchair-user access.

Additional References for Architects & Interior Designers:

We have learnt to tailor solutions to the different level of needs that Healthcare and other buildings belong to, under the classifications of the [National Construction Code](#).

Class 1

Domestic or residential buildings – single, standalone single houses and horizontally attached houses, such as terrace houses, row houses or townhouses. This class includes two sub-classifications:

- Class 1a – a single dwelling or one of a group of attached dwellings, e.g. a terrace house
- Class 1b – a boarding house, guest house or hostel with a floor area less than 300 m².

Class 5

Office buildings for professional and/or commercial purposes, such as offices for government agencies, accountants or lawyers.

Class 9

Public buildings – includes three sub-classifications:

- Class 9a – healthcare buildings such as hospitals and day surgery clinics
- Class 9b – buildings where people assemble for social, political, theatrical, religious or civic purposes, e.g. schools, universities, sports facilities, night clubs
- Class 9c – aged care facilities.

At Billi we understand the important duty of planning a functional living or work environment, and we strive to meet not only the basic standards, but also go beyond to help our clients in specification stay "up to code" too.

Select your preferred instant filtered water system by choosing the ideal combination to suit your requirements

Decide on the number of people that will be using the instant filtered water system

Select your preferred dispenser design from the compatible options

Optional Add Ons

Would you like a PLUS unit with separate sink mixer to provide hot & cold water?
Select your preferred mixer tap option

Need to install away from a sink? Use our range of fonts and risers to ensure the dispenser is optimally positioned

Select a specialty dispenser for additional safety in critical care environments

flow MEETS FUNCTION

The Billi Multifunction Mixer Tap is a testament to our commitment towards innovation and excellence, we've created a perfect filtered water system that is both functionally versatile and aesthetically elegant for any modern kitchen.

Recognised by Good Design Australia awards, our Multifunction Mixer Tap exemplifies the perfect blend of state-of-the-art filtration with under-bench technology, making it one seamless solution where 'Flow meets Function'.

ELEVATED TAP ARCH

Elevate your kitchen with an increased height clearance of 260mm, with 180° degrees of arch rotation.

OPTIMISED SPOUT TIP

Over 2 years of innovation and rigorous testing to ensure optimal user experience.

SPACE SAVING

2 fixtures in 1 that offer a worry-free classic installation or a seamless retrofit, increasing valuable counterspace.

AWARDED BY EXPERTS

Critiqued and recognised by a panel of global design experts as a solution to satisfy density reform in residential developments & flexible workspaces.

All in One Multifunction Mixer Tap. Seamlessly Integrated User Interface.

ONE 5 in 1 FUNCTIONALITY

One multifunctional fixture to match Billi's range of instant filtered boiling, chilled, sparkling and mains fed hot/cold water systems.

ERGONOMIC INTERFACE

Practical touch-sensor user interface placed on the side to reduce risks of scalding, splashing, and accidental dispense.

SMART SAFETY

"Red for no, green for go." Smart locking tech with visual safety and fault indicators, in line with Billi's protection protocols.

AUSTRALIAN DESIGNED & MADE

Compliant to Watermark with a 5-Star WELS rating to meet & exceed ANZ Standards.

Available Finishes

Have it All, in One.

MULTIFUNCTION FILTERED DRINKING WATER APPLIANCE

Billi's new OmniOne range is the latest iteration of multifunction filtered drinking water appliances.

The intersection of genuine innovation and sustainable design, OmniOne integrates Billi's renowned water-cooling and energy reclaim technologies into single space-saving under bench control module.

With a 30% uplift in performance, whisper quiet in operation, ergonomic and acutely focused on the wellness & hygiene of it's users, the OmniOne range is the ultimate inclusion to the modern workplace or facility.

OmniOne Pro60 supersedes the **Quadra Sparkling 460**.
OmniOne Plus 9 supersedes the **Quadra Sparkling Plus+ 9**.

CHOICE OF DISPENSER DESIGNS

Sleek compatibility. Multifunction appliance compatible with all Billi tapware styles, ranging from boiling to chilled, and sparkling to still.

SPACE SAVING

40% less clearance required than comparable models. High on spec, but small on space.

NO AIR VENTS NEEDED

Cross ventilation not required, no unsightly joinery cutouts or costly accessories.

INTUITIVE CONTROLS

Intuitive controls. Easy time, temp & safety settings; with energy-saving, override and locked-off modes.

SUPERIOR PERFORMANCE

30% more capacity and more consistent delivery of cold water than than any previous model.

SILENT DESIGN

Whisper quiet! 70% dB noise reduction during normal operation, eliminating noisy interruptions.

HEAT EXCHANGE TECHNOLOGY

Reduce energy waste with Billi's world-leading water-cooled and heat energy reclaim tech.

SMART SAFETY

Billi's protection protocols guard against cross contamination, and mitigates risks of Legionella.

*comparable models refers to Billi's previous BCS platform.

Urban Brass XL Levered Dispenser with matching Round Gooseneck Mixer Tap

X SERIES DISPENSERS

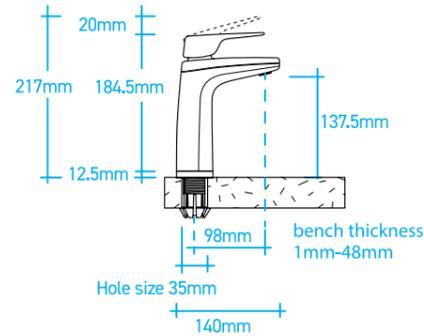

XL Levered Dispenser (XL)

Our Commercial Flagship and still a classic, the levered dispenser is streamlined and elegant. It is simply operated with position-sensitive levers.

Add 'L' and finish code to product code (901000LCH)

AVAILABLE FINISHES

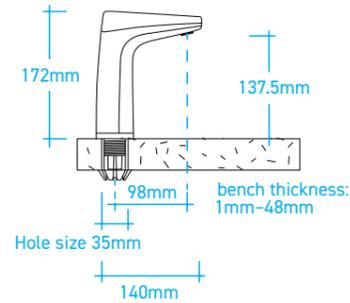

XT Touch Dispenser (XT)

The touch dispenser is an innovative, contemporary design, which has a top operating panel offering a sophisticated and clean style.

Add 'T' and finish code to product code (901000TCH)

AVAILABLE FINISHES

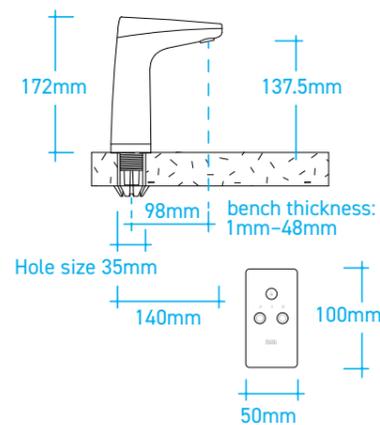

XR Remote Dispenser (XR)

The remote dispenser is another version of the lever free dispenser, however the operation panel is located away from the dispenser. This can be installed in your desired position to meet design requirements, particularly wheelchair access.

Add 'R' and finish code to product code (901000RCH)

AVAILABLE FINISH

MULTIFUNCTION MIXER & SPECIALTY DISPENSERS

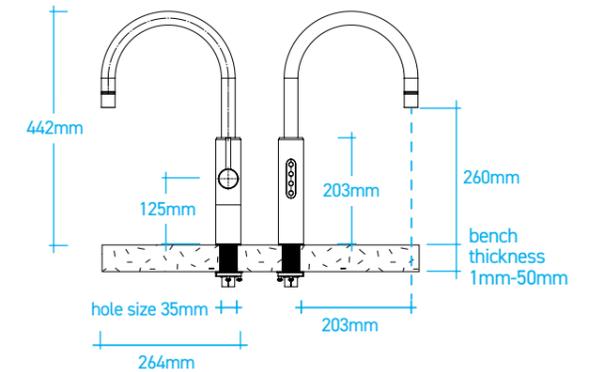

Multifunction Mixer Tap (G)

Award winning multifunction dispenser capable of dispensing filtered drinking water and domestic water for the sink from a single fixture. Requires Hot & Cold mains connection.

Add 'G' and finish code to product code (926060GCH)

AVAILABLE FINISHES

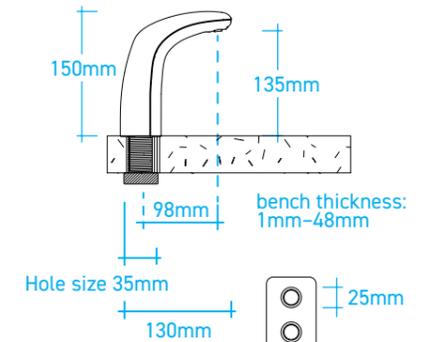

Safety Dispenser (SD)

Safety Dispenser has been specifically designed as a solution for critical care applications, such as correctional centres, mental health facilities and aged care.

Add 'V' and finish code to product code (901000VCH)

AVAILABLE FINISH

Coloured XL Levered Dispenser

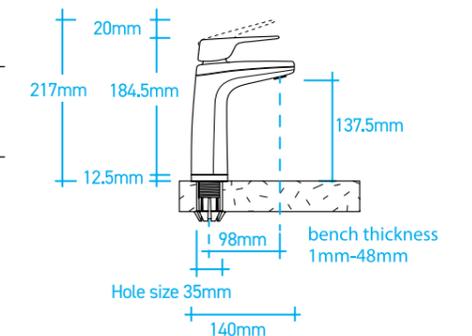

Special order coloured levers provide full vision safety where LED indicators cannot be seen.

Spare Parts Code: 996300
Add 'LRB' to the product code (901000LRB)

BRAILLE PADS

Optional braille pads can be supplied with the coloured XL levered dispenser to provide further safety for vision impaired users.

AVAILABLE FINISH

Dispenser finishes

Our dispensers come in a variety of modern and stylist finishes to match your kitchen environment.

There are 4 standard finishes and 2 special order finishes, that may incur longer lead times, to choose from.

Standard finishes

Special order finishes

*Refer to individual specification for available finish range by product variant

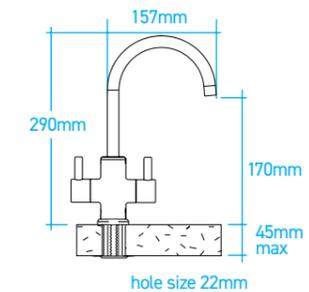

Dual Lever Dispenser **(D)**

Round in design with dual levers. Suitable for chilled and sparkling water.

Add 'D' and finish code to product code (933100DCH)

AVAILABLE FINISHES

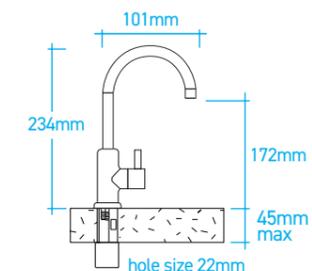

Round Slimline Dispenser **(R)**

Round in design with single pin lever option. Suitable for ambient or chilled water.

Add 'R' and finish code to product code (932060RCH)

AVAILABLE FINISHES

BILLI MOBILE INNOVATION

Billi's **3D Build** is the latest mobile innovation. The online tool allows you to specify and shop our products in a few simple clicks.

Use the 3D build to visualise how a Billi system would look in your commercial or residential kitchen.

We're pleased to continue to innovate for Specifiers with access to TWO specification & documentation portals.

- 3D Build provides you with a guided specification resource that simulates your selection into a staged environment while providing all of your documentation requirements.
- The BSPEC Generator also provides guided specification support, generating key documentation and basic images for download.

WARRANTY & CERTIFICATIONS

*On Quadra and QuadraPlus models only.

Standard Warranty

All components of the drinking water systems are covered by a 24-month warranty. OmniOne products are covered under 36 month warranty. The washroom range is covered by a 12 month warranty.

Commitment to Quality

A strong commitment to quality is as important to Billi as style, function and innovation. Recognising the importance of reliability to customers, all Billi water systems are manufactured to strict quality standards.

Every system is designed to provide the highest possible standards of efficiency and energy savings.

Certifications

Every Billi drinking water appliance is manufactured under a certified quality control system. They have been tested and comply with all relevant standards.

Billi **Eco, Eco Sparkling, Quadra, Quadra Sparkling, Quadra Plus, Quadra Sparkling Plus, Billi Sahara and Sahara Plus** systems are tested to and comply with; Watermark license number WM-21525, AS/NZS3498.

Billi **Alpine** and **Filter Tap** systems are tested to and comply with; Watermark license number WM-21882, ATS 5200:105.

Billi **Multifunction Mixer Tapware** is tested and compliant to Watermark WM 021914.

BWT filter models 994051, 99052, 994054, 994056 & 994060 are tested to and comply with; Watermark license number WM-022902.

All Billi systems are also tested to AS/NZS 4020; AS1428 Accessibility Design Requirements. Billi is also ISO 9001, ISO 14001 & ISO 45001 certified, Certified Certificate Number QEC11627.

Billi **Quadra** and **Quadra Plus** products are certified Gold Level under Global GreenTag LCARate standard 4.0.

Billi's range of Filter, Mixer and Sensor taps are Watermarked and licensed under WELS T14803, T40034, T40038, T40039, T40040, T40041, T40042, T26149, T30968, T36026.

Billi systems are certified under HACCP PE-972-WAT-1-02.

Billi has been a Cornerstone Member of the International WELL Building Institute (IWBI) since 2019 and certified under IWBI's 'Works With WELL' program since 2024.

*Every effort is made to ensure all certifications listed are up to date, however this list may not be extensive or in full.

Matte Black XL Dispenser with matching 120mm riser and font

Regina, Vic

"The Billi hot & filtered cold tap is by far the more superior product in my experience. There are 4 reasons for this. Firstly, we love the ease with which the Filter Cartridges - just slot in and click into place for replacement, couldn't be simpler. The second major advantage is the reduced and more efficient unit size that sits underneath in the cabinet below - it takes up far less room than the competitor offering. Importantly, the price point is by far lower, a real no brainer! And lastly, the unit is reliable and looks fabulous. I could not recommend the Billi tap enough. It isn't my first Billi tap, and it won't be my last"

Marteli, NZ

"I would like to add a thank you to your technician; he was very clear in his explanation and made it easy for me to understand. He carried out many tests that no one had done before, and it's refreshing to get to the bottom of my issue. While I understand it is an ongoing problem due to the plumbing works, the technician provided me with quick fixes in the meantime. Enjoy your afternoon!"

Sugi Tjiu, Melbourne

"Extremely happy with the purchase and service by Billi team. I have installed the unit for more than a year without hiccup. The convenience of using the product makes me smile every time I use it. Glad to be able to support our local Australian manufacturing that is now a rare sight. Keep up the good work!"

Fotis, Melbourne

"Such a convenient and good looking appliance. There isn't a day that goes by where we don't use our Billi. Easily pour boiling, chilled or sparkling filtered water at the touch of a button. This is our 2nd one, we moved into a house that didn't have a Billi and had to put one in!"

@scotbuildshamptonhome

Best investment ever... I love how quick I can make my coffee/tea in the morning with this instantaneous hot water Billi tap #billitap #instantaneous #instanthatdrinks #tea #coffeelover #coffee @billiwater
